## FOREWORD

It is my esteemed pleasure to present the Strategic Plan 2023 - 2027 for the Embassy of the Republic of Kenya in Brasilia. The strategic direction outlined in this plan is shaped by the Strategic Plan of the Office of the Prime Cabinet Secretary and Ministry of Foreign and Diaspora Affairs (OPCS and MF&DA) and draws from the Constitution of Kenya 2010, Kenya Vision 2030 & the Fourth Medium Term Plan (MTP IV), Bottom-Up Economic Transformation Agenda (BETA), the Kenya's Foreign Policy and other key guiding documents.

Established in 2006, the Kenya Embassy Brasilia has the mandate of articulating and implementing Kenya's Foreign Policy in Brazil, Argentina, Bolivia, Chile, Paraguay, Peru and Uruguay. This Strategic Plan provides a roadmap to achieve this mandate and attain to our vision of being a modern and world class diplomatic Mission. It further charts the Mission's strategic objectives, key priorities, anticipated challenges, required resources and institutional frameworks for the five-year period. The Strategic Plan will be our lodestar as we diligently work to contribute to Kenya's socioeconomic development.

The Strategic Plan has outlined key result areas, performance indicators and a robust Monitoring & Evaluation framework to track progress. To implement its mandate, the Mission will engage a wide array of stakeholders including the Ministry of Foreign and Diaspora Affairs and other Ministries, State Departments and Agencies, the Governments of Brazil & countries of accreditation, the Kenyan Diaspora and the private sector.

The Mission will spearhead the enhancement of bilateral and multilateral relations with the countries of accreditation, foster mutually beneficial cooperation and deepen Kenya's diplomatic footprint. We shall also be at the forefront of forging closer trade and investment ties with Brazil and countries of accreditation through dynamic economic & commercial diplomacy. Mainstreaming the Kenyan Diaspora into national development, safeguarding their welfare and enhancing provision of Consular Services will be of particular importance.

The Mission shall endeavour to uplift Kenya's image and increase awareness of her rich cultural heritage through a progressive Public Diplomacy approach. Stringent governance, adherence to National Values, and a comprehensive policy and institutional framework shall underpin the Mission's activities.

We look forward to collaborating with all stakeholders to ensure efficient service delivery and attainment of Kenya's Foreign Policy objectives in Brazil and countries of accreditation.

**Amb. Dr. Andrew Karanja, PhD**

It is used to measure a project impact, outcomes, outputs and inputs that are monitored during project implementation to assess progress.

**Key Activities:** Actions taken or work performed, through which inputs are mobilized to produce outputs.

**Key Results Areas:** They are the broad areas in which you are expected to deliver results. This is an outline of the organization's areas of focus. It also refers to the general areas of outputs or outcomes for which an organization's role is responsible e.g. Bilateral Agreements & MoUs.

**Outcome:** The intermediate results generated relative to the objective of the intervention. It describes the actual change in conditions/situation as a result of an intervention output(s) such as changed practices as a result of a programme or project.

# CHAPTER **1** INTRODUCTION

## **CHAPTER ONE: INTRODUCTION**

This chapter describes the centrality of the Strategic Plan in achieving organizational success, the context and environment around which it is developed including consideration of national development priorities, regional and international development frameworks, relevant provisions of the Constitution, Kenya Vision 2030, BETA and the MTP IV.

### **1.1 Strategy as an Imperative for Organizational Success**

Strategic planning serves as a cornerstone within the results-based management framework, ensuring that public sector institutions meticulously define their strategic directions and make well-informed decisions regarding resource allocation to effectively implement priority policies and programs. Its significance lies in its catalytic role in driving the entire results-based management ecosystem towards achieving desired outcomes, including prudent public finance management, effective performance monitoring, citizen-centric service delivery, and integrated payroll and personnel database management. This necessitates a collective commitment from all stakeholders to fulfil the Mission's corporate objectives, which are rooted in its strategic issues. Moreover, it underscores the importance of clear, proactive, and meticulously crafted strategies to guide the Mission towards goal attainment, optimal performance levels, and the realization of its vision.

Strategic Planning encompasses the formulation, implementation, and evaluation of cross-functional decisions aimed at guiding an organization towards the attainment of its overarching objectives. It comprises a series of systematic processes designed to assess an organization's strategic landscape and chart a course for the future, with the primary aim of enhancing performance, service delivery and governance effectiveness. These processes are centered around the development and execution of Strategic Plans, establishment of service delivery standards, creation of citizen service delivery charters, formulation of annual work plans, negotiation of performance contracts, and conducting staff performance appraisals. Together, these components form the foundation upon which organizations navigate complexities, adapt to changing environments, and strive for continuous improvement and excellence.

Strategic Plans play a vital role in guiding organizations to align their strategies, activities, and budgets with the overarching national development priorities. These priorities are articulated in various strategic frameworks including the Kenya Vision 2030 and its Medium-Term Plans, the Bottom-Up Economic Transformation Agenda (BETA), the East African Community Vision 2050, the African Union Agenda 2063, the United Nations (UN) 2030 Agenda for Sustainable Development, as well as other pertinent international and regional treaties and conventions.

## 1.2 The Context of Strategic Planning

This Strategic Plan is developed in consideration of national development priorities, as well as regional and international development frameworks.

### United Nations 2030 Agenda for Sustainable Development

The Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity. The Vision 2050 focuses on initiatives that will create gainful employment to the economically active population to accommodate the development pillars and enablers that will create jobs to absorb the expected expansion of the workforce during the Vision 2050. The pillars of Vision 2050 further offer opportunities for job creation, which are important to absorb EAC's growing labour force and unemployment problem. Long-term job creation requires skills development that is consistent with the emerging development opportunities in infrastructure development; industrialization and manufacturing; value addition in agriculture industry; facilitating the export of labour and management of human capital development.

The Mission will seek common positions with the Embassies of EAC partner states in engagements with the Governments of Brazil and countries of accreditation aimed at enhancing development and socio-economic transformation.

## **Constitution of Kenya 2010**

The Constitution of Kenya is the supreme law of the Republic and binds all persons and all State organs at both levels of government. Article 10 of the Constitution outlines the national values and principles of governance, which include democracy, rule of law, transparency, accountability, inclusivity, human dignity, equity, social justice, inclusiveness, equality, human rights among others. Article 232 also spells out the values and principles of public service to include high standards of professionalism, accountability, inclusivity, effectiveness, responsiveness, and involvement of the people in the process of policy making. The Vision is implemented through 5-year successive Medium-Term Plans (MTPs). MTP IV (2023-2027) will implement the fourth and second-last phase of the Kenya Vision 2030, which coincides with this Strategic Plan period. MTP IV sets the momentum for transition to the next long-term development agenda for the Country and aligns with the Bottom-Up Economic Transformation Agenda (BETA) and other regional and international development frameworks.

The BETA is geared towards economic turnaround and inclusive growth, and aims to increase investments under five pillars, namely: Agricultural Transformation; Micro, Small and Medium Enterprise (MSME); Housing and Settlement; Healthcare; Digital Superhighway and Creative Industry. ## Micro-Environment

The micro-environment analysis looks at the fundamental factors within the immediate operating environment that exert influence over the optimal functioning and execution of the Embassy's mandate. Key among them include:

**Table 2: Analysis of Micro-Environment**

| No. | Factor                     | Description  |
|-----|----------------------------|--|
| 1.  | Delayed exchequer releases | This limits the Embassy's ability to implement its programs within the planned timelines. Most of Mission's programs and activities are largely dictated by external calendars and schedules, while project contracts are implemented under foreign laws and regulations, some of which are very strict. Therefore, payment delays have far-reaching implications. |
| 2.  | Foreign Exchange Losses    | The Mission experiences foreign exchange losses in the disbursements from the Ministry headquarters. This impacts on the Mission's ability to fund budgeted operations, programmes and activities.   |

| No. | Factor                          | Description  |
|-----|---------------------------------|--|
| 3.  | Human Resources                 | The Mission's Local and Home-Based Staff Establishment may need to be expanded to facilitate robust advancement of Kenya's foreign policy priorities in Brazil and countries of accreditation.   |
| 4.  | Inadequate Budgetary Allocation | <p>The Mission's budgetary allocation may be insufficient to support full engagement with stakeholders in Brazil and countries of accreditation. The expansive nature of Brazil, the distance of commercial hubs such as São Paulo from the administrative capital Brasilia, the lack of additional diplomatic representation and the dispersed nature of the Diaspora necessitate a strong budgetary allocation to support the Mission's outreach activities.</p> <p>Insufficient resources may also impact the quality and efficiency of consular services</p> |

## Challenges

The following challenges were faced during the implementation period 2018/19-2022/23 Strategic Plan:

### External Challenges:

- i. Lack of direct flights from Kenya to South America. This impedes promotion of Kenyan products and tourism
- ii. Delays in processing of letters of Credence for Countries with Multiple accreditations.
- iii. Foreign Policy shifts in countries of accreditation.

## **Internal- Management/Administrative Challenges:**

1. Inadequate resources both human and capital for marketing the country. The Mission is not adequately facilitated to undertake economic diplomacy due to shortage of funding.
2. Inadequate budgetary allocations especially for operations and maintenance limits the Mission's capacity to realize its strategic objectives. Most countries in the region are expansive and thus the Mission requires adequate resources to venture out to promote Kenya and also carry outreach visits to meet the Diaspora.
3. Appropriations in Aid (A-I-A) - The Mission witnessed reduced A-I-A collections after the government fully automated the issuance of visas through the E-Visa platform in June 2021.
4. Foreign Exchange Losses- The Mission experiences huge foreign exchange losses in the disbursements from headquarters. This impacts the already inadequate allocations
5. Staffing levels- the current Home Based and Local Staff establishment may compromise service delivery and attainment of the Mission's strategic objectives.
6. COVID-19 Pandemic- The closures associated with the pandemic affected interactions and the activities of the Mission.
7. Relatively low utilization of ICT solutions due to lack of adequate IT capabilities in Missions.
8. Delay in dispatch of funds undermines effective service delivery and at times leads to punitive fines from service providers

9. Lack of an Immigration Officer and biometric facilities to issue the new generation e-Passport.

## **Lessons Learnt**

1. The COVID-19 pandemic ushered in new possibilities in diplomatic engagement where work can be done and objectives met through virtual meetings.
2. Deployment of political officers with proficiency in Portuguese and Spanish is central in the realization of the objectives of the Mission which covers a region that is predominantly Portuguese and Spanish speaking.

## Leadership

The Head of Mission will provide leadership for the implementation of this Strategic Plan. The teams, which are aligned to the strategic issues, will lead in coordinating the execution of planned activities for the purpose of responsibility and accountability.

## Systems and Procedures

The Embassy will leverage its established internal systems, processes, and standard operating procedures to execute this Strategic Plan effectively. The Work Plan will be derived from the broader Ministerial Work Plans, ensuring alignment with national priorities. Additionally, both home-based and locally engaged staff will be appraised based on their individual work plans to maintain accountability and performance standards.

To uphold compliance with performance guidelines and regulations, the High Commission will integrate performance contract targets from this Strategic Plan into its Performance Management System (PMS). The Performance Management Committee will oversee this process, ensuring targets and supporting evidence are systematically uploaded and managed through the Government Human Resource Information System (GHRIS) and PMS. This approach enables real-time tracking, reporting, and monitoring of the Strategic Plan's implementation.

The Embassy will also adhere to standard operating procedures regarding the accounting of allocated resources through annual accounting and reporting to the Ministry of Foreign and Diaspora Affairs. This includes the convening of the Human Resource Management Committee to address staff performance, development, and deployments, as well as holding senior staff meetings to brief on progress in the implementation of projects and programs and to provide policy guidance and solutions to any related issues. The State Department's administrative rules, human resource manuals, financial regulations and procedures, and other guidelines issued from time to time will be followed and applied to ensure the effective implementation of the Strategic Plan.

### **6.3 Risk Management Framework**

The Embassy has identified the following categories of risks that may hinder the realization of the Strategic Plan. These risk categories are prioritized based on the likelihood of occurrence, expected impact, and proposed actions for mitigation, monitoring, and reporting, as outlined in Table 11 below.

**STRATEGIC PLAN 2023 - 2027**

# CHAPTER 7

## RESOURCE REQUIREMENTS AND MOBILIZATION STRATEGIES

## CHAPTER SEVEN: RESOURCE REQUIREMENTS AND MOBILIZATION STRATEGIES

The chapter outlines the financial requirements for the implementation of planned activities, projects, and human resource management and development, based on key result areas as estimated in the implementation matrix. Additionally, the chapter compares the resource requirements against the projected resource allocation in the medium term to identify resource gaps. It further proposes means of bridging the difference and ensuring prudent resource utilization.

### 7.1 Financial Requirements

Guided by the Action Plan in table 6.1, this section provides estimates of resources for the implementation of the action plan on Financial Year basis. The total annual budget is informed by the KRAs and administrative costs, as demonstrated in table 7.1 below. The Mission requires **Kshs 1207.75 million** to execute its **seven (7)** Key Performance Areas within the five-year plan.

**Table 12: Financial Requirements for Implementing the Strategic Plan**

## 7.2 Resource Gaps

The resource gaps are determined by the variances between resource requirements versus available resources as shown in Table 7.2. The resource gaps inform resource mobilization strategies. The resource allocations for the first three (3) years are guided by the MTEF Budget estimates, while the two (2) outer years are projections based on allocation trends.

An analysis of the resource requirement compared to projected resource allocations shows that the Mission has a resource gap of **Kshs. 112.07 million** within the period of the plan. The resource gap computation is provided in table 7.2 below.

**Table 13: Resource Gaps**

## **7.3 Resource Management Strategies**

Given the resource constraints faced by the government in the recent past, Mission is required to come up with strategies for efficient and effective resource management. These include: -

- i. Prioritization of the Mission's activities.
- ii. Strictly adhering to the Public Financial Management Act (2012) and other related Acts and attendant regulations including PFMA Regulations of 2015, Public Audit Act 2015, Public Procurement and Asset Disposal Act (2015) and its Regulations (2020), as well as other financial management instructions in form of Circulars issued by the National Treasury from time to time.

# CHAPTER 8

## MONITORING, EVALUATION AND REPORTING FRAMEWORK

## **CHAPTER EIGHT: MONITORING, EVALUATION AND REPORTING FRAMEWORK**

This chapter describes the systematic approach for monitoring and reviewing the progress of implementing the Strategic Plan. It outlines the Monitoring and Evaluation Frameworks to be employed, expounds the Performance Standards guiding monitoring and evaluation process, and outlines the schedule for both mid-term and end-term evaluations of the Plan. Additionally, it provides the mechanisms for reporting and feedback regarding the implementation of strategic plan interventions.

### **8.1 Monitoring Framework**

This M&E framework describes how the entire M&E system for Mission's programs and activities will operate. The framework utilizes indicators for each level of the programs, namely outputs, outcomes, and strategic objectives. It offers the delivery method and identifies those responsible for delivering expected results.

Monitoring and Evaluation will be at the centre of the implementation of this Strategic Plan. Through M&E, the Mission will be able to assess how its interventions change over time, how effectively its programs are implemented, whether there are gaps between planned and achieved results that need addressing, and whether the changes realized have any impact. Each Monitoring and Evaluation session will provide a chance for learning to help improve practices in the future. It will also enable informed decision-making and ensure accountability for allocated resources.

Data collection will provide an evidence-based approach to the monitoring and evaluation process. The Mission will collect data regularly to accurately track key performance indicators or identify areas needing improvement during different stages of project's life cycle. Data analysis will help identify potential risks or opportunities as well as highlight areas needing improvement.

In its Monitoring Framework outlined below, the Mission has identified the key performance indicators to be tracked and has established the baseline data for each indicator to be monitored.

For continuous improvement in targeted results, the Mission will rely on performance contracting processes, ensuring that negotiated targets are growth-oriented and focused. Annual work plans and performance contracts will be the main tools used in monitoring the implementation of this Strategic Plan. Reporting on indicators will occur quarterly and annually. Implementation of Performance Contract targets will be monitored in real-time through the online Performance Management System (PMS).

Drawing on the National Monitoring and Evaluation Implementation manual, this M&E Framework will consist of the following key elements:

- i. Specific output and outcome indicators which provide guidance as to whether the Plan objectives have been successfully achieved.
- ii. An operational plan that details the sequencing of activities from data collection to the feedback cycle.
- iii. Accountability for the production of reports.
- iv. Responsibility for acting on reports.

## **8.2 Performance Standards**

In the monitoring and evaluation of the implementation of performance indicators, the Mission will be guided by and observe internationally accepted norms and standards, including relevance, efficiency, effectiveness, success, and sustainability. The Central Planning and Project Monitoring Department (CPPMD) will ensure that the standards are met. This will be achieved through vetting annual work plans and performance contracts to ensure that the output and outcome indicators are Specific, Measurable, Achievable, Relevant, and Time-bound (SMART).

In undertaking the preparation of this Strategic Plan and in the subsequent implementation of the performance targets, the Mission will comply with guidelines, norms, and standards such as the Performance Contracting Guidelines; Guidelines/Standards for Preparation, Appraisal, Monitoring & Evaluation of Development Projects; Monitoring and Evaluation Norms and Standards; Guidelines for the Preparation of Strategic Plans; Guidelines for Implementation of the National Integrated Monitoring & Evaluation System (NIMES); Public Investment Management Guidelines; and Public Finance Management regulations, among others.

### **8.3 Evaluation Framework**

The Mission will undertake a comprehensive mid-term review of the implementation of the Strategic Plan. This review will aim to evaluate the cumulative successes achieved by the plan and focus on the remaining half of the period. The review will further assess whether the Mission will be on track to attain all its targets as set out in the plan or if there would be a need to vary the targets accordingly, especially to accommodate any emerging issues. Further, Ad-hoc reviews of the Strategic Plan will be undertaken when the need arises, and an end-term review will be conducted at the end of the plan period.

The Mission will assess the level and extent of achievement of its strategic objectives through this Evaluation Framework. The aim is to measure the attainment of its strategic goals along with the respective KRAs. To enable this, the output/outcome Performance matrix has included clearly defined outcome indicators, baselines, and targets as summarized in table 8.1. The KRAs and outcomes are drawn from the Action Plan Implementation Matrix in chapter 6.

## 8.4 Mid-Term Evaluation

The Mid-Term Evaluation of the Strategic Plan will be undertaken between November 2025 and February 2026. During this period, all individuals responsible for implementing the various indicators outlined in the plan will be tasked with submitting their progress reports. This comprehensive process will facilitate the assessment of the extent of implementation, identification of gaps, understanding of encountered challenges, and extraction of valuable lessons learned.

Following this analysis, the Mission will deliberate on the outcomes and determine the necessary corrective actions and strategies for moving forward effectively. Furthermore, should it become evident that adjustments to the Strategic Plan are warranted, revisions will be duly considered and undertaken as necessary.

## 8.5 End-Term Evaluation

The end-term evaluation will be undertaken between July and September 2028. It will entail taking stock of all performance indicator targets in the Plan and accounting for implementation results. An end-term evaluation report will be produced.

## 8.6 Reporting Framework and Feedback Mechanism

This section outlines the reporting framework and feedback mechanism, which will constitute the standard framework for reporting on the implementation of this Strategic Plan's interventions. The frameworks, presented in table form,

provide for the types of reports (Monitoring, Evaluation), the frequency of reporting (quarterly or annually), the responsibilities for monitoring, and the users of the reports as outlined in Quarterly Progress Reporting Template Tables, Annual Progress Reporting Template, and Evaluation Reporting Template in **ANNEX II**.

In addition, the framework ensures that lessons learnt are captured and fed into a continual adjustment and improvement of the necessary corrective interventions in the strategy. To do this, measurements of actual performance will be made at predetermined times and compared with the performance standards. If the actual results fall outside the desired tolerance range, action will be taken to correct the deviation. The action taken will be of such nature that it will not only correct the deviation but also prevent its recurrence.
